PROJECT

Compare Quick

- Built a user-friendly platform for efficient mobile phone comparison. Streamlined decision-making with a straightforward interface, user registration, and communication forms. Planned future upgrades based on user feedback and industry trends.

Insiya Hardware, Dubai | Website Development

- Developed and launched the Insiya Hardware website using Bootstrap, creating a responsive, user-friendly design that significantly boosted customer engagement and online visibility.

Manglam Voyage Services

- Developed and launched a dynamic car rental system using PHP and MySQL, featuring user authentication and streamlined booking management. The responsive design enhanced user experience and improved client engagement on a web hosting platform.

ACHIEVMENT

- **Undergraduate Fellowship Program:**
Completed the Undergraduate Fellowship at Charotar University, contributing valuable insights to transformative research. Recognized for dedication to academic excellence and collaboration within a diverse team.
